Professional Summary

Software Engineer with experience in backend development, cloud-native architectures, and Generative AI solutions. Currently working as an AI Python Engineer at a corporate AI platform, building production-ready applications using Python, AWS Bedrock, AgentCore, RAG architectures, embeddings, AI agents, and modern AI-assisted development workflows. Strong background in designing scalable APIs, cloud infrastructure, and distributed systems using AWS, Docker, Terraform, PostgreSQL, and Redis. Experienced in technical leadership, software architecture, code reviews, and client-facing collaboration.

Professional Experience

Auramind.ai

AI Python Engineer | Oct 2025 – Present

- Develop backend services and AI-powered features for a corporate Generative AI platform using Python and AWS.
- Design and implement solutions leveraging AWS Bedrock, AgentCore, RAG architectures, embeddings, AI agents, and MCP-based integrations.
- Build integrations with external AI providers and services, including image generation workflows through OpenRouter.
- Develop integrations with enterprise platforms such as Google Drive and Microsoft services.
- Collaborate with multidisciplinary teams to deliver scalable and production-ready AI solutions.
- Utilize AI-assisted development workflows with tools such as Cursor and Claude Code to improve engineering productivity and software quality.

B2Bit Software House

Backend Engineer & Tech Lead | Jul 2024 – Oct 2025

- Led development initiatives for banking and financial services.
- Defined software architecture and participated in critical technical decision-making processes.
- Conducted code reviews and promoted engineering best practices across development teams.
- Facilitated sprint planning, technical discussions, and client-facing meetings.
- Developed scalable REST APIs and backend services using Python, Django, Django REST Framework, and Django Ninja.
- Built cloud-native solutions leveraging AWS, Docker, Redis, PostgreSQL, and modern DevOps practices.

Senac Labs - Senac RN

Full Stack Developer | Feb 2023 – Aug 2024

- Developed web and backend applications using React, TypeScript, Node.js, Python, and PostgreSQL.
- Built chatbot solutions integrated with Telegram using Node.js and TypeScript.
- Created responsive user interfaces based on Figma prototypes.
- Designed and implemented REST APIs and database-driven applications.

EA WebDev

Full Stack Developer | Jan 2021 – Feb 2023

- Developed custom web applications and small business solutions for clients using Node.js, JavaScript, React, and SQL databases.
 - Designed and implemented REST APIs, backend services, and database architectures tailored to project requirements.
 - Built responsive and interactive user interfaces using React and Vanilla JavaScript.
 - Worked with PostgreSQL, MySQL, and MongoDB to model, store, and manage application data.
 - Integrated third-party services and external APIs to support business workflows.
 - Maintained and enhanced existing applications, focusing on performance, scalability, and code quality.
 - Collaborated directly with clients to gather requirements, define technical solutions, and deliver projects from conception to deployment.
-

Education

Bachelor's Degree in Computer Science

Universidade Potiguar (UnP), Brazil

July 2021 – July 2025

Certifications

AWS Certified Cloud Practitioner

Issued: Dec 2024

Expires: Dec 2027

Credential ID: 268a3660c48e4a43955117c84088459f

Technical Skills

- Languages: Python, JavaScript, TypeScript, SQL
 - AI & GenAI: AWS Bedrock, AgentCore, RAG, Embeddings, AI Agents, MCP, OpenRouter, Prompt Engineering
 - Backend: Django, DRF, Django Ninja, Node.js, Express.js, REST APIs
 - Cloud & DevOps: AWS, Docker, Terraform, Git, CI/CD, Linux
 - Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB
 - Frontend & Mobile: React JS, React Native, Javascript vanilla, Tailwind CSS
-

Languages

- Portuguese: Native
- English: Upper-Intermediate (B2)
